**Lynx® Customer Testimonial**

***Lynx® Inventory Management for Specialty Practices***  
**Neurology Practice Testimonial**  
**Neurology Specialists, Norfolk, Va**  
**Wendy Van Fossen**

**Savings**

“Having **Lynx®** in our practice has allowed us to save on average two hours a week on both the administrative and clinical side when doing inventory management.”

**Overall Experience**

“Having **Lynx®** has been phenomenal, it’s like night and day compared to the paper environment we were using before. I can easily use Lynx to see how much drug our practice has on hand compared to the payments we’ve received, ensuring I only pay for drugs we have been reimbursed for.”

“Before **Lynx®** we were using self-made labels, and now we have the ability print labels directly from Lynx that identify the patient and the drug to go on the IV bags. This and the ability to track each drug in one consolidated place has been huge for us.”

“**Lynx®** gives me piece of mind in that I know we can track each drug, whether its buy and bill or from specialty pharmacy, and make sure we’re capturing the correct inventory and using the appropriate vial for each patient.”

“**Lynx®** is a game changer for practices of our size that don’t have the resources to host a dedicated inventory management system.”

**Implementation**

“Our implementation process was very smooth. Over the course of four days the **Lynx®** team was onsite. The first day they set up the equipment and then spent the next three days walking my staff through the process and ensuring everyone was comfortable with the entire setup. By the end of that week, our team was up and running on their own.”

## Lynx® Customer Testimonial

### Reporting

“With [Lynx®](#) I can cross-reference the reports it produces with my financial reports and quickly confirm how much drug is in stock and that all charges have been captured.

“I use the inventory and usage reports frequently. In the past I had to wait for logs and then check them numerous times to ensure everything was correct. [Lynx®](#) captures all that information when I need it and has reduced the human error in the process.”

- Wendy Van Fossen, Practice Administrator  
Neurology Specialists, a division of  
Neurology Consultants of Tidewater, PLLC
